Supply Chain Practitioner

Welcome to the Supply Chain Practitioner programme.

The Level 3 programme is designed for those working in forecasting, planning or scheduling roles in fast moving, agile, supply chain or transport functions.

The programme focuses on developing the complex skill sets these roles require and covers areas such as capacity planning, data analysis and continuous improvement techniques. Learners will also develop their communication, problem-solving and prioritisation skills, as well as their ability to respond to change.

Once completed, Learners will have gained a nationally recognised Supply Chain Practitioner Apprenticeship Standard and, depending on their job role, may want to consider progression on to an Improvement Practitioner or Associate Project Management Level 4 Programme.

ABOUT INTEC BUSINESS COLLEGES

We are a national training provider, who have worked with organisations across the UK helping them to upskill their workforce through vocational qualifications since 1982. Our mission is to enable our Learners to develop, progress and achieve.

THE PROGRAMME [*]

The Learner will receive a 2-3 hour monthly visit from a dedicated Intec Tutor who will deliver the Standard remotely. All sessions will be supported by our online delivery platform, Smart Assessor, where Learners can upload their work and Tutors and Managers can monitor their progress between visits.

As part of an Apprenticeship, Learners are required to spend 6 hours a week (based on 30-hour contract) engaged in off the job training. This can be achieved in a variety of ways.
